| <http://mycareer-aditya.site/>

Electrical Engineering graduate from State University of Malang with a background in power systems, renewable energy, industrial automation, and electrical system development. Experienced in the design, implementation, and troubleshooting of electrical, control, and electronic systems through academic, research, and industrial projects. Proficient in engineering software including ETAP, PVsyst, Proteus, Autodesk Inventor, SketchUp, and other electrical engineering tools.

Work Experience

PT. Energi Terbarukan Internasional - Surabaya, Indonesia

Feb 2025 - Jun 2025

Internship

Solar PV EPC contractor providing engineering, procurement, installation, and commissioning for reliable renewable energy solutions.

- Hybrid solar PV installation for a pet shop in Surabaya
- Hybrid solar PV installation for a tennis court in a premium residential area in Surabaya
- Feasibility design and analysis of a solar panel system for an industrial facility in Surabaya

PT. King Manufacture - Sukoharjo, Indonesia

Oct 2021 - Mar 2022

Internship

PT King Manufacture is a company engaged in automation, tool making, manufacturing, and plastic injection.

- Designed and implemented electrical wiring for an industrial automation wooden carrier train, ensuring reliable operation.
- Implemented emergency safety systems on a sawmill conveyor to improve operational safety standards.
- Electrical and mechanical repairs on a 3-axis CNC milling machine to ensure optimal operation and accuracy.

PT. Alfian Mechatronics Innovation - Malang, Indonesia

Jul 2020 - Dec 2020

Internship

PT. Alfian Mechatronics Innovation provides contracting, supply, consulting, and industrial electrical automation training services.

- Installed hybrid solar panel systems (off-grid and on-grid) for residential housing to improve energy savings and reliability.
- Developed a solar panel trainer with pneumatic actuators to simulate solar tracking systems for education and training.
- Implementation of 3000W Solar Panel-Powered Submersible Pump Water Well Construction
- Installation of Public street lighting at P4TK Batu

Education

State University of Malang - Malang, Indonesia

Aug 2022 - Jul 2026

Bachelor of Electrical Engineering, 3.84/4.00

- Relevant Coursework: Power- System Analysis, Power Electronics, Electrical Machines, Power Generation, Transmission & Distribution, Grounding/Protection, High-Voltage Engineering, System Operation/Stability, Control Systems, Industrial Instrumentation.
- Final Project: Electro-Thermal Analysis of a PV-Fed Inverter Drive System for an Induction Motor Water Pump

State Vocational High School 1 Purwosari - Pasuruan, Indonesia

Jul 2018 - Jun 2022

High School Diploma in Mechatronics, 86.35/100.00

- Designed and developed a PLC trainer for industrial automation applications.
- Programmed and installed an automated sorting machine for competency assessment.
- Installed and tested DoL, forward-reverse, star-delta, and electropneumatic control systems.

Research Experience

INTELLIGENT POWER ELECTRONICS AND SMART GRID - Malang, Indonesia

Oct 2023 - Dec 2025

Research Assistant

IPESG is a research and development team at State University of Malang, chaired by Prof. Aripriharta.

- Implementation of a Bottle Sterilization System with IoT-App Based Digitalized Production to support the development of MSMEs
- Design and development of a grass chopper machine powered by solar panels as a solution for cattle feed management.
- Development of a SCADA IoT Edukit for Collaborative Factory Automation Practices Among Engineering Students during Training.
- DRTPM Research Project: Development of a Picohydro Low Head System for Sustainable Green Economy in Rural Areas.
- Pilot project on picohydro technology as an initiative to penetrate the renewable energy market through a startup
- Supported development and testing of renewable energy, automation, and IoT-based engineering systems
- Prepared technical documentation and performance analysis for electrical and research project implementations
- Assisted system integration and validation for electrical engineering prototypes and renewable energy applications

Publications, Projects & Achievements

- **Industrial Design** 📌 (2025): Generator Edukit
- **Copyright** 📌 (2025): Distance Relay Training System Based on Esp32 for Protection Zone Simulation
- **Copyright** 📌 (2025): PicoHydro Commercial Website
- **Copyright** 📌 (2024): Fingerprint Flora
- **Publication** 📌 (2024): Developed IoT-App-based bottle sterilization power monitoring system to support MSME production efficiency
- **Publication** 📌 (2024): Design of Resistive Power Control Based on Microcontroller with TRIAC
- **Achievement** 📌 (2024): Second Place winner at the national Abisatya Business Idea Development Competition 2024
- **Achievement** 📌 (2024): Contributed to community-service implementation of a solar-powered grass chopper for cattle farmers
- **Achievement** 📌 (2024): Speaker at Community Service Seminar on university-community collaboration for sustainability
- **Achievement** 📌 (2023): Gold Medal recipient at ARAU ACE, Malaysia, for E-MOS IoT environmental monitoring
- **Achievement** 📌 (2023): Best Award Category recipient at ARAU ACE, Malaysia, for E-MOS IoT innovation
